

AVENGER FLEET VU (AFV)

**Remote Engineering
and Certification
Assistance**

AFV Remote Engineering/Cert Capabilities

The ability to connect engineers/DERs to technicians on the hangar floor or in the field with remote assistance by sharing live video, audio, pictures and other content to support specific tasks such as repairs, inspections, testing, customer support, etc.

- Hands-free videoconference with field technician's field of vision
- Red dot pointer with object tracking
- HD photo from the device's camera
- Capture and edit a freeze frame of the video call, type notes and send it back to the field technician
- Record and store videoconferences
- Send documents in image file formats
- Screensharing: field technician can see the screen of the remote expert(s)
- Webcam: field technician can see through the webcam of the remote engineers and DERs

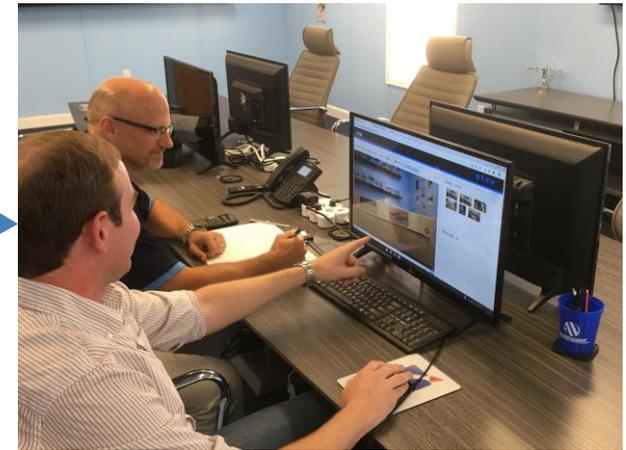

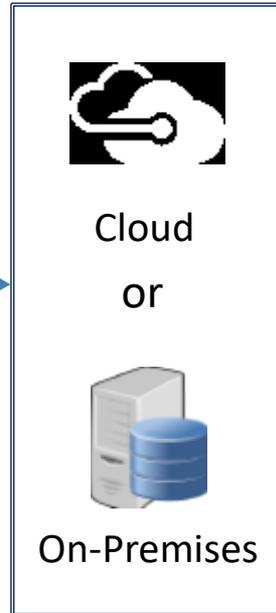

- Increase efficiency of communications to speed the execution of paper and shop work
- Several experts can communicate at same time
- Experts can be virtually present during a repair, installation, inspection, testing, flight training
- Can be used anywhere a wi-fi signal is present
- Train your own staff without travel

- User can access Avenger technical experts at standard rates already established and for AOG/after hours at 1.5 x standard rates
- User can share within corporate borders without need of contacting Avenger experts

These can pay for themselves with the very first use!

AFV Synchronous Communication

1. Technician performs complex maintenance or inspection job

2. Technician uses smart glasses to request live assistance from Avenger's Remote Expert

3. Avenger's Remote Expert is able to provide effective assistance through local technician's point-of-view. Either party can snap pictures, videos and can coordinate with voice driven instructions, guidance, exchange of information, etc.

Pricing Sheet

Avenger Fleet Vu will save time and money when the need for on-site engineering or certification occurs. This will reduce the need for travel costs as well as decrease the amount of time both the shop and engineering spend on the exchange of vital information used to formulate a repair or installation.

AFV can also be used to connect different customer facilities to each other.

2019 Pricing

All pricing includes 3 years of software licensing

Remote-Site Single Pair of Work Glasses and Software License \$7,800.00

* *Communication with remote Avenger Technical Specialist (expert)*
